

REIMAGINE REAL TIME COLLABORATION

THE FUTURE OF WORK & LEARNING

Serl.io develops Mixed Reality solutions including MRx, a Mixed Reality HoloLens collaboration platform to evolve the way we work, learn and discover.

MRx is designed to put the technology into everyone's hands, not just pro developers. This makes scaling the use of Mixed Reality easier, so you can quickly unlock opportunities from improved engagement, collaboration and efficiency.

Collaborate everywhere

Create immersive Mixed Reality content, then deploy in collaborative sessions to engage participants in real-time 3D anywhere.

[Learn More](#)

Easy and Powerful

No coding needed. 'Gaze and drop' your uploaded assets with the HoloLens to create interactive step-based Mixed Reality content for your sessions.
